IN THE SPECIFICATION:

A substitute specification with double-spaced lines is provided herewith.

Please amend page 16, paragraph 42, of the specification as follows:

With reference now to Figure 5, a mock-up of a user interface dialog enabling search of hotlist entries utilizing content-identifying keywords in accordance with a preferred embodiment of the present invention is depicted. Dialog 50[[0]]2 allows the user to search the keyword substructures of a hotlist for selected search terms. Dialog 50[[0]]2 allows the user to enter one or more search term(s) within the primary keyword query term blanks input-boxes 504, and to select logical operators using a logical operator blank 506 for logical linking of terms submitted in the keyword query. Any number of keyword term blanks input-box 504 and logical operator blanks input-boxes 506 may be provided to the user, and the number of provided keyword term blanks input-boxes 504 and logical operator blanks input-boxes 506 may be expanded when those provided are all utilized.
